***Please note:** Per City Ordinance **§ 155.016 UTILITY EASEMENTS**, sprinkler heads shall not be located within any easement or public rights-of-way unless authorized by the City Engineer, and only at the owner's risk as to all cost for demolition, removal and reconstruction. Therefore, any sprinkler heads installed in an easement and/or right-of-way area that are damaged during City projects and/or snow plowing events are the owner's responsibility to repair and/or replace.

Also, per City Ordinance **§ 52.066 BACKFLOW PREVENTION DEVICES** and **§ 52.067 INSPECTION AND MAINTENANCE OF BACKFLOW PREVENTION DEVICES**, backflow devices are required for all public water connections. They are also required to be inspected on an annual basis at the owner's expense and a copy of said inspection is to be provided to the City thereafter.
